### DETAILED ACTION

This Office Action is in response to the Applicant's amendment filed May 16, 2005.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 7, 9 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Kadota (US 20020126719 A1).

In regard to claim 7, Kadota teaches a semiconductor light emitting device comprising a light emission layer, consisting of an GaN system semiconductor 45, 46 & 47, which is interposed between an n type GaN system semiconductor layer 44 and a p type GaN system semiconductor layer 48, wherein there is provided a B-doped ZnO.

electrode film when  $z=0$  in  $Mg_zZn_{1-z}O$  ( $0 \leq z < 1$ ) (Figure 5, pages 2-3, paragraphs [0035]-[0038]).

In regard to claim 9, Kadota teaches a metal electrode 49, which supplies an electric current to the n type GaN system semiconductor layer, wherein said B-doped ZnO electrode film (when  $z=0$  in  $Mg_zZn_{1-z}O$  ( $0 \leq z < 1$ )) is formed between the n type GaN system semiconductor layer 44, and the metal electrode 49.

In regard to claim 11, Kadota teaches a metal electrode 49, which supplies an electric current to the n type GaN system semiconductor layer 44, wherein the metal electrode 49 and the B-doped ZnO electrode film (when  $z=0$  in  $Mg_zZn_{1-z}O$  ( $0 \leq z < 1$ )) adjoin each other and the metal electrode 49 and the B-doped ZnO electrode film are arranged so as to be contiguous to the face of the n type GaN system semiconductor layer 44 (Figure 5, pages 2-3, paragraphs [0035]-[0038]).

#### ***Allowable Subject Matter***

Claims 1-6 are allowed.

Claims 8, 10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to further show the state of the art with respect to semiconductor light emitting devices:

Chai (5,625,202)	Furukawa et al. (US 6,320,207 B2)
Hosono et al. (US 6,806,503 B2)	Sakai (US 2003/0209723 A1)
Shimoyama et al. (5,804,834)	Udagawa (US 6,541,797 B1).
